PROFILE

Data Science & AI master's student in Munich with a computer science degree and 1.5 years of professional software engineering. Focused on LLMs, Retrieval-Augmented Generation, knowledge graphs and intelligent agents, backed by hands-on experience building production systems and data models. Interested in working-student roles and internships in AI, data science and software engineering.

EDUCATION

M.Eng. Data Science & Artificial Intelligence, Munich University of Digital Technologies & Applied Sciences — Oct 2026 to present

- Modules include: Generative AI and intelligent agents (LLMs, RAG, knowledge graphs, agent architectures), machine learning and data engineering (predictive modeling, causal inference, large-scale data processing) and responsible AI (fairness, transparency, accountability)

B.Sc. Computer Science and Engineering, American International University-Bangladesh, Dhaka — Jun 2021 to Dec 2025

- Coursework: artificial intelligence, machine learning, data science, computational statistics and probability, algorithms, databases, software engineering, software quality and testing

RESEARCH & PROJECTS

Speech Emotion Recognition with a Hybrid BiLSTM-Transformer, B.Sc. thesis — 2024 to 2025

- Team of four. Hybrid BiLSTM-Transformer model in PyTorch combining MFCC and prosodic features, trained on the RAVDESS dataset (1,344 samples, seven emotions) with a speaker-independent split
- Reached 79% accuracy and outperformed CNN baselines

AI and ML to Protect Heritage Sites in Bangladesh, research paper — 2024

- Team of three. Systematic literature review of research from 2005 to 2024 on AI for climate risk, predictive maintenance and sustainable tourism at cultural heritage sites, identifying research gaps and a practical framework

EXPERIENCE

Junior Software Engineer, Threesquare, Dhaka, Bangladesh — Jul 2025 to Aug 2026

- Engineered a multi-platform restaurant POS system, translating real business workflows into data models and system logic
- Designed and managed the PostgreSQL data layer for consistent, reliable transactions across platforms
- Built full-stack and cross-platform features with C#, ASP.NET Core, Angular and Blazor MAUI Hybrid

Software Engineering Intern (mandatory B.Sc. internship), Threesquare, Dhaka — Mar 2025 to Jun 2025

- Built backend APIs in C#/.NET Core with ASP.NET Identity for authentication and role-based authorization
- Designed database schemas with Entity Framework Core and PostgreSQL and worked in a team with GitHub code reviews

SKILLS

- **AI & data:** Python, PyTorch, TensorFlow, TensorRT, ONNX Runtime, machine learning, deep learning, computational statistics
- **Databases:** PostgreSQL, SQL, Microsoft SQL Server, MySQL, schema design
- **Software:** C#, ASP.NET Core, Entity Framework Core, Angular, JavaScript, C++, Java, Git/GitHub

LEADERSHIP & LANGUAGES

- **CEO (volunteer), Sabertooth Wolves esports** · 2020 to 2025. Rose from player to CEO, led teams across several countries and coordinated online tournaments with partners in India and China
- **Member, AIUB Competitive Programmers Community** · 2022 to 2025
- **Languages:** Bengali (native), English (C1/C2), German (A1, learning)
